

MISSION STATEMENT

The mission of the Gray Collegiate Academy Soccer Program is to develop young men and women who hold themselves accountable in the various platforms of life.

The first tier requires all players to be academically sound and pursue the future of their choice after graduation.

The second rung demands all players to possess integrity of the utmost degree in the social, academic, and athletic spheres.

The final level calls for players to compete at the highest level and sustain the passion and determination to succeed on the soccer pitch.

In addition, our mission as players and coaches is to create and sustain a positive and reliable team chemistry that will not only allow for the players to compete collectively and individually, but that also is sustainable during difficult and challenging obstacles. As a team we will never lower our heads when the game doesn't go our way. Rather, we will keep our heads high and help one another learn from our mistakes. The team is more important than the individual, but if an individual player struggles academically, socially, or athletically, the team strives to help that individual to succeed. We are a team that is proud of our teammate's individual achievements, not jealous, and we understand that each individual has a significant role as we strive toward success.

In the end, the Gray Collegiate Academy Soccer program is a family that supports one another on and off the field. Together, we continuously create the tradition of Gray Collegiate Academy and all those who have played before us, and all those that will play after us.

Whether it is on the field or in the classroom, we follow our motto:

No Excuses. No Quitting. Only Determination, Respect, and above all else Family!

“War Eagles”
